Profile

I'm a young, passionate and creative cinematographer. I have been working with motion pictures for the last 5 years. I have lit and shot a diverse selection of projects in various environments and situations that has given me a strong "on set" background allowing me to develop an approach to both the creative aspects of cinematography as well as technical and logistical sides.

I have written several music video scripts, a short movie script and other scripts for various projects like corporate videos and promo videos – all of these also produced and directed.

I pay attention to details, I'm punctual and I have "can do" attitude. I'm quick to learn and adapt to various situations and scenarios that might occur while pursuing creative process. I love nature and travel and I'm keeping up to date with latest filmmaking techniques, gear and gadgets.

Motion pictures is my life and the thing I enjoy doing the most, so whatever it is you need help in making - I'm here, ready to jump in with my enthusiasm pants on!
